(54) Title: SOFTWARE DOWNLOAD INTO A RECEIVER

(57) Abstract: The invention relates to a method of downloading software programs into a storage unit. The software programs include a boot code and an application code, the boot code allowing downloading the application code. The storage unit comprises at least a current boot code and a current application code. The method comprises: - upon a download request, downloading a new boot code in a location, which does not overwrites the current boot code, - indicating that the new boot code replaces the current boot code, - downloading a new application code associated to the new boot code in a location, which does not overwrites the new boot code, - indicating that the new application code is valid.
